INTRODUCTION

The Government of India felt the need for a permanent agency to expedite the publication of standards and development of test facilities in parallel when the work on the preparation of the standards is going on, as the development of improved safety critical parts can be undertaken only after the publication of the standard and commissioning of test facilities. To this end, the erstwhile Ministry of Surface Transport (MOST) vide order No. RT-11028/11/97-MVL dated September 15, 1997. The standard prepared by AISC will be approved by the permanent CMVR Technical Standing Committee (CTSC). After approval, the Automotive Research Association of India, (ARAI), Pune, being the Secretariat of the AIS Committee, has published this standard. For better dissemination of this information ARAI has published this document on their Web site.

Performance of lighting and light-signalling devices for Agricultural Tractors is a safety requirement. AIS-062 covering these requirements has been published in 2004 and implemented in October 2005 vide notification GSR 206 (E) dated 1st April 2005.

With a continuous change in European Regulations to cater for new technologies and enhanced safety requirements, it was felt necessary to upgrade this standard to the level of corresponding ECE regulations.

The AISC panel and the Automotive Industry Standard Committee (AISC) responsible for preparation of this standard is given in Annex 1 and Annex 2 respectively.
